'57 Classic Humbuckers

With its "Patent Applied For" decal on the baseplate, the '57 Classic and '57 Classic Plus are faithful replicas of the famous Gibson humbuckers that helped define the music of the late 1950s.

While this timeless beauty gives you a tone that is warm and subtle with full, even response, it doesn't hold back when you need that classic Gibson humbucker crunch!

The '57 Classic features Gibson's special Alnico II magnet, vintage enamel coated wire, nickel plated pole pieces, nickel slugs, maple spacers and vintage-style, two-conductor, braided wiring. The '57 Classic is available with genuine gold-plated covers, nickel-plated covers, or open coils.

'57 Classic Plus

The perfect bridge-position companion to the '57 Classic, the '57 Classic Plus mimics those late-1950s humbuckers that received a few extra turns of wire. This treatment gave the pickup slighter higher output without sacrificing its rich, vintage tone.

It helps overdrive tube preamps to a smooth level of saturation without becoming overpowering. Made with the same features as the '57 Classic, the '57 Classic Plus is available with genuine gold-plated covers, nickel-plated covers, or open coils.
